Fox Rothschild's Health Law Practice

Few industries undergo the type of continual transformation that defines the health care industry in the United States.

Whether your company provides health care, pays for health care, develops information technology, researches and develops new medical drugs and devices or otherwise provides services or goods in the health care sector, you are subject to complex regulatory and business risks at multiple levels.

Responding to these issues with experience and personalized service has earned Fox Rothschild its reputation as a leading national health law practice. We work with our clients — locally, regionally and across the nation — carefully reviewing each situation to determine options and tailor solutions to fit the circumstances at hand and the individuals involved.
