

Jinesh Mehta

Managing Director, Lead AI and Transformation
BDO

Panel: AI in Government Contracting | 12:30–1:30 pm

Jinesh leads Digital Transformation and AI at BDO, focusing on aligning people, process, and technology to help clients select and scale the right solutions for better outcomes. He drives the firm's AI practice, bringing thought leadership and a repeatable approach to help organizations identify high-value use cases, define practical roadmaps, and consistently deliver measurable ROI.

Jinesh has led AI-enabled roadmap development and large-scale transformation initiatives for nonprofit and government contracting organizations. He has driven AI-focused business system assessments to identify high-impact automation and analytics use cases, define prioritized roadmaps, and embed AI across program and operations functions. In parallel, he has guided complex, multi-year enterprise transformations by designing future-state operating models, rationalizing extensive application portfolios, and developing phased transformation roadmaps that align business strategy, customer experience, and modern technology platforms. His approach integrates governance, change management, and quick-win execution to ensure organizations realize measurable value while building a scalable, future-ready digital and AI foundation.

Prior to joining BDO, he brings over 18 years of experience in product strategy, program management, and enterprise transformation, with deep expertise in financial services, SaaS platforms, and regulatory technology. He has led large-scale initiatives including a \$35M finance transformation, enterprise agile adoption, and platform modernization programs, while managing portfolios up to \$65M and overseeing cross-functional teams of 100+ resources. His experience also includes building and scaling revenue-generating products to \$22M+ ARR, driving AI-enabled automation, and delivering measurable outcomes such as 50% reductions in processing time and significant revenue growth.
