

Odia Kagan

Partner and Chair, Data Privacy Compliance & International Privacy

okagan@foxrothschild.com

Philadelphia, PA

Tel: 215.444.7313

Fax: 215.299.2150

Selected to the Chambers Global and Chambers USA lists of ranked attorneys for Privacy & Data Security, Odia is Co-Chair of our Privacy & Data Security Practice and Chair of Data Privacy Compliance & International Privacy.

She advises companies of varying industries and sizes on how to comply with data-related regulations involving artificial intelligence (AI), biometrics, General Data Protection Regulation (GDPR), the California Consumer Privacy Act (CCPA) and other U.S. data protection laws.

With an emphasis on assessing trends and future proofing compliance, Odia provides clients timely, pragmatic advice on how to design and implement their products and services in a compliant manner — all delivered with a touch of humor. She also leverages a broad network of colleagues in more than 30 countries to prepare business for regulations around the world.

A recognized leader in the privacy space, Odia holds three law degrees, five bar admissions (New York, Pennsylvania, Israel, England & Wales (Inactive), New South Wales Australia (Inactive) and seven privacy certifications (IAPP Certified Information Privacy Professional in the laws of the United States – private sector (CIPP/US) and the laws of the European Union (CIPP/E), IAPP Certified Information Privacy Manager (CIPM); IAPP Privacy Law Specialist (PLS), IAPP Fellow of Information Privacy (FIP), PECB Certified Data Protection Officer (CDPO), and IT Governance UK Certified GDPR Professional (C-GDPR/P).

A former partner in a Tel Aviv law firm, Odia also is a Co-Chair of our Israel Practice Group and has substantial experience working with Israeli startups and assisting multinational companies with cross border transactions.

Representative Engagements:

- Assisted several car manufacturers in their deployment of U.S. privacy compliance for their consumer facing, as well as connected and autonomous, functions.
- Assisted an audience measurement business in compliance with the Maryland Online Data Privacy Act standard of data minimization and treatment of sensitive information.
- Assisted a leading oil and gas company in its compliance with new state privacy laws and their interplay with state biometrics laws.
- Assisted a large education tech provider in compliance with the UK Age Appropriate Design Code and the U.S. Children Online Privacy Protection Act (COPPA)
- Assisted a leading retailer and a provider of human resources services in compliant deployment of AI-assisted functions for hiring and promotion.

- Assisted a leading provider of connected devices and a clinical trial sponsor in compliance with EU cross border transfer requirements and transfer impact assessments.
- Assisted a leading credit union in deployment of biometrics and AI projects, including conducting data protection impact assessments.
- Assisted providers in the ad tech and genetics fields in compliance with the DOJ Final Rule Prohibiting and Restricting Transfers of Bulk Sensitive Personal Data.
- Advised multiple clients on website privacy compliance to mitigate risk of lawsuits under CIPA in connection with website and email tracking pixels.
- Assisted a large international hospitality provider with its global privacy compliance efforts, including revision of vendor agreements, revision of privacy and information security policies, assistance with Data compliance and preparation for GDPR compliance.
- Assisted clients, including a supplier of aerospace systems and a medical device company, in the formulation and documentation of a cross-border data transfer strategy for employee information, preparation for certification under the Data Privacy Framework and preparation for compliance with the EU General Data Protection Regulation (GDPR).
- Drafted and negotiated master services agreements, EU data processing agreements and information security policies for a company providing services for clinical trials conducted worldwide.
- Represented a large broadcasting and telecom provider in the sourcing of hosted services related to its consumer information.
- Assisted a provider of Voice over Internet Protocol (VoIP) telephony platform with sophisticated call analytics in the design of its service incorporating security considerations and in the negotiation of its services agreement and terms and conditions of use.
- Advised a leading professional development membership organization on compliance with EU Data Protection Directive and "Cookie Directive."

AdTech

Businesses of all types rely on data-intensive digital advertising technology to reach and understand their customers. The collection, custody and care of this critical consumer information carries significant risk, particularly in light of rapidly changing state, federal and international data privacy regulations and ever advancing technology.

Odia Kagan closely follows the AdTech industry, and writes and presents frequently on the latest data privacy developments in this rapidly evolving space.

[Podcast: Simplify for Success - A Conversation with Odia Kagan](#)

In this episode of *Simplify for Success*, Odia sits down with Priya Keshav, CEO of Meru Data, for a discussion on ways to provide control and choice to users on cookie banners as well as the importance of disclosures and how they should be more explicit and transparent.

[Webinar: PrivacyConnect Chapter Meeting](#)

This chapter meeting will focus on the latest privacy regulatory developments, including CCPA, CPRA, Schrems II and LGPD, and feature panels from local privacy professionals to discuss operational best practices.

Podcast: Being a Good Steward of Data with Privacy Lawyer, Odia Kagan

In this episode of *Marketing Today*, Odia and Alan discuss why marketers should care about data protection and what they should be paying attention to in the connection between marketing and data. For those unfamiliar with CCPA and CPRA laws, Odia breaks down what each means and why they are relevant to marketing.

Article: User IDs Without Cookies or Logins: Is Fingerprinting an Option?

With transparency, user consent, and data protection mechanisms businesses can expand user identification beyond logins to create a scalable framework that works for everyone.

Article: On-Device User ID Technology Offers Privacy Benefits

It may be implemented differently across different operating systems, but on-device tech is likely to be the future framework of the open web.

Article: Evaluating Post-Cookie Identity Solutions

There is emerging consensus, industry-wide, about what identity and addressability should look like in the future.

Article: France's CNIL Issues Chatbot Data Protection Guidance

France's CNIL, Commission Nationale de l'Informatique et des Libertés, has issued guidance on data protection in the use of chatbots.

Article: More Customers Using Messaging Channels to Interact With Brands

Many customers expect two-way interaction with a brand through messaging or online chat.

Article: Bulletproofing Identity Solutions: No Workarounds for Informed Consent

"There are no workarounds for informed consent...advertisers need to secure consumer permission before using their data, and they need to secure that permission transparently."

Article: Efforts to Police User IDs Should Avoid Anticompetitive Outcomes

Companies and governments should avoid taking steps that hurt small-to-midsized companies in an effort to improve user ID privacy.

Alert: IAB Europe Updates Advice on Ad Targeting Without Third-Party Cookies

The Interactive Advertising Bureau (IAB) Europe recently updated its Guide to the Post Third-Party Cookie Era. In this client alert, Odia provides key takeaways and offers an overview of the various targeting techniques used today and some options and consideration going forward.

Article: Connected TV Device IDs Key to Future of Targeted Digital Ads

With the industry moving away from cookies, experts suggest connected TV device IDs may become the next key to linking people and their devices in a secure way at the household level.

Article: IAB Benchmark Survey Offers Insight Into Industry's CCPA Compliance Efforts

Key takeaways from the Interactive Advertising Bureau (IAB) Legal Affairs Council's CCPA Benchmark Survey, which asked privacy attorneys in the industry about key elements of the California Consumer Privacy Act and their compliance efforts, in its first year of implementation.

[Article: French Data Protection Authority Offers Advice on Cookies, Trackers](#)

Highlights from CNIL's detailed guidance on online cookies and trackers, including guidelines, recommendations, FAQs and a statement on audience measurement.

[Article: Are Data 'Bunkers' a Privacy-Safe Way to Connect Identity](#)

Company creates databases that mirrors brands' data environment to match against other databases for planning, activation or measurement.

[Article: Addressable TV Offers Advertisers Another Targeting Option](#)

Advertisers and agencies are increasingly using addressable TV to reach customers at the household level.

[Article: CTV Audience Data Transforming Ad-Funded Streaming](#)

CTV device IDs may become the center of the audience identification puzzle.

[Article: U.S. Overdue for Smart National Data Privacy Law](#)

Companies committed to ethical data use need to enter the debate with a balanced, or "middle ground" approach *now*, or risk losing trust, sentiment and engagement, very soon.

[Article: New Venture Offers Another Option for the Post-Cookie World](#)

The combination between a contextually-focused exchange and authenticated traffic sets out to enable private marketplace buys that have been curated to include both a marketer's own customers and the contexts in which they want to be.

[Article: Data Collection Ethics a Growing Concern for Advertisers](#)

According to the World Federation of Advertisers, 74% of CMOs say data ethics will be more important to their role in the next five years.

Automotive

Whether fueled by gas, electricity or an alternative energy source, all connected or autonomous vehicles require large quantities of data to operate — information that must be safeguarded.

Odia Kagan tracks rapidly evolving issues at the intersection of transportation and data security to advise automotive industry clients on how to keep their data secure and comply with domestic and international data privacy laws and regulations. A thought leader in this emerging field, Odia is a frequent author and presenter on data protection for vehicles employing autonomous and computer-aided navigation.

[Article: FTC Issues GLBA Safeguard Rule FAQs: What Motor Vehicle Dealers Need to Know](#)

The FTC has issued FAQs for how Motor Vehicle Dealers can comply with the Gramm-Leach-Bliley Act's Safeguards Rule. Are you a financial institution? What customer information do you have? How should you implement an information security program? Odia offers guidance.

[Podcast: Outsmarting a "Smart" World](#)

In this episode of *She Said Privacy/He Said Security*, Jodi and Justin Daniels sit down with Odia Kagan, Partner at Fox Rothschild LLP, to discuss how to protect your privacy and security in a world that's digging for data. Odia talks about the importance of transparency from autonomous vehicle companies, the rise of zero-party data, and how privacy laws are being enforced.

[Article: What Can We Learn From the Garante's Recent 2.5M Euro Fine?](#)

In this IAPP article, Odia outlines the Italian Data Protection Authority's decision on the food delivery company Deliveroo. The Garante issued a 2.5 million euro fine against Deliveroo for inappropriately processing driver's personal data.

[Article: With Biden Order, 'Right to Repair' in Federal Focus](#)

Odia spoke with Automotive News about President Biden's recent executive order urging the Federal Trade Commission to take action on "right to repair," and how this may impact the auto sector.

[Webinar: The Future of Connected Vehicles](#)

In this OneTrust DataGuidance webinar, Odia Kagan joins an expert panel to discuss the future of connected vehicles and considerations for overcoming the privacy challenges involved in this developing topic. Key takeaways from this conversation include how advanced technologies, such as facial recognition and data monitoring, are being addressed and securely governed to align with global privacy standards and a roadmap for what is to come for the future of connected vehicles.

[Webinar: Connected Vehicle Commerce](#)

In this Informa Tech Automotive webinar, the panel discusses how OEMs can master in-vehicle commerce that meet customer expectations and give a competitive advantage; whether or not consumers are still resistant to adopting automaker apps; and what value in-car payments bring compared to mobile payments.

[Webinar: On the Road to Privacy Autonomous Vehicles and Privacy Compliance](#)

Join OneTrust DataGuidance and the expert panel for a webinar discussing the privacy challenges created by autonomous vehicles, what these look like in the changing landscape of US privacy law, and what stakeholders in the autonomous and connected vehicle space should be thinking about.

[Article: Can Location Data Truly Be Anonymized? New Research Says No](#)

New research, detailed in an article distributed by the International Association of Privacy Professionals, suggests location data is vulnerable to reidentification, even in a very large dataset.

[Article: EU: EDPB Issues Guidelines on Connected Vehicles](#)

The European Data Protection Board has issued final guidelines for the processing of personal data related to autonomous vehicles.

[Article: Federal Cyber Shield Act Aims to Protect Connected Devices](#)

U.S. lawmakers have reintroduced legislation to protect connected devices.

[Article: California Law Would Govern Use of In-Vehicle Cameras](#)

The California Senate Judiciary Committee has approved a bill regarding consumer choice related to the installation and use of in-vehicle cameras.

[Alert: Israeli Justice Ministry Lays Out Key Questions on Regulation of Autonomous Vehicles](#)

Israel's Ministry of Justice has issued a call for public comments regarding the regulation of autonomous vehicles, with a focus on the tort and insurance aspects.

[Article: French Data Protection Authority Sets Guidelines for Use of Drones by Law Enforcement](#)

France's CNIL, the Commission Nationale de l'Informatique et des Libertés, has opined on the "Global Security law" and use of drones by law enforcement.

[Article: Groups Outline Cybersecurity Risks for AI in Autonomous Vehicles](#)

The European Union Agency for Cybersecurity (ENISA) and the Joint Research Centre of the European Commission (JRC) have issued a joint guidance on "Cybersecurity Challenges in the Update of Artificial Intelligence in Autonomous Driving.

[Article: German Federal Government Advances Effort to Govern Autonomous Vehicles](#)

German Federal Transport Minister Andreas Scheuer predicts the new rules will make Germany "a world leader in autonomous driving."

[Article: Blurred Images Collected by Autonomous Vehicles Can Be Personal Data Under GDPR](#)

Automated vehicle manufacturers beware: Blurred images can still be personal data under the European Union's General Data Protection Regulation (GDPR), says French Data Protection Authority CNIL in a statement on the use of drones by French police.

[Article: European Parliament Addresses Smart Mobility Apps, Data Privacy and C-ITS](#)

The European Parliament issued a detailed study on the impact of smart mobility applications on the future of transport and addressed some data protection issues.

[Article: German Transport Authority, Information Security Office Plan Cooperation on Autonomous Vehicles](#)

The German Federal Motor Transport Authority (KBA) and the Federal Office for Information Security (BSI) recently signed an administrative agreement for cross-departmental cooperation to facilitate and accelerate the safe development of automated and networked driving.

[Article: Ireland: Employee Vehicle Tracking And Guidance From the DPC](#)

Due to the importance of data protection law for employee monitoring practices, a careful and considered approach must be taken when potentially highly intrusive methods, such as tracking employee vehicles, are used.

[Alert: Federal Autonomous Vehicle Bill Includes Detailed Privacy, Cybersecurity Requirements](#)

A detailed summary of the data protection and privacy provisions included in the federal Safely Ensuring Lives Future Deployment and Research in Vehicle Evolution (SELF DRIVE) Act.

[Article: Connected Vehicles Covered by Data Protection Laws](#)

Wards Auto: Today's computer-aided vehicles compile a broad range of location, communication and other data, some of which can be used to identify the individuals using the car, or the car itself. This personal data falls under the scope of privacy laws such as the California Consumer Privacy Act and the EU's General Data Protection Regulation.

[Alert: European Commission Releases Autonomous Vehicle Privacy Recommendations](#)

The EU recommendations for safeguarding basic privacy rights include obtaining informed consent for data processing, offering users various levels of privacy, protecting the rights of groups such as pedestrians, drivers and passengers and adopting transparency strategies.

[Article: Protecting Data from Autonomous Vehicle Training: Guidance from the Lower Saxony DPA](#)

Privacy Compliance & Data Security: Training autonomous vehicle navigation systems requires the collection of copious amounts of visual data, including images of license plates and recognizable faces. A regional German Data Protection Authority offers guidelines for processing and protecting that data.

Article: EDPB Issues Draft Guidelines on Connected Vehicles

OneTrust Data Guidance: The European Data Protection Board's guidelines encourage vehicle manufacturers to build-in "protection of personal data" during the design phase and call on all stakeholders, from car dealerships and repair shops to in-vehicle entertainment system providers, to prioritize data privacy.

Alert: We're All Connected: EDPB Publishes Draft Guidelines on Connected Vehicles

The European Data Protection Board published broad guidance on safeguarding the data collected by connected vehicles, including three categories requiring special attention: location data, biometric data and data that could reveal traffic offenses.

Webinar: Connected Vehicles, Connected Data, Complex Compliance

In this OneTrust webinar, Oda joins Andreea Lisievici, Head of Group Data Protection Compliance at Volvo Car Corporation in Sweden to discuss the types of data that connected vehicles process and how that data is governed by the EU's General Data Protection Regulation and the California Consumer Privacy Act.
